

Road Ahead in Physiotherapy

(28th December 2022)

- **Objective:** Raising awareness about the importance of gender equality in society.

Description:

It might be surprising to know that Physiotherapy today is one of the most demanding fields in the medical profession. According to WHO (World Health Organization) stats, India should have one physiotherapist for every 10,000 residents. Given the Indian population, the need for Physiotherapists in India is estimated to be approximately 1.4 lakhs. This demonstrates that there are significant disparities between demand and supply for physiotherapists in India. Considering this, physiotherapists have tremendous employment and career opportunities; Banarsidas Chandiwala Institute of Physiotherapy has organised a 1-day Seminar on topic “Road Ahead in Physiotherapy”. The session was led by Dr. Shreshtha Yadav (PT), alumni of BPT Batch 2006. Ma’am started the talk by asking questions about Ma’am interacted with students talking about her experience with the college and how the institution still continues to help their alumni by any means possible.

The session was led by Dr. Shreshtha Yadav (PT), alumni of BPT Batch 2006. Ma’am runs her own clinic in Najafgarh by the name Advaita Physiotherapy and Neuro-rehabilitation. Ma’am interacted with students talking about her experience with the college and how the institution still continues to help their alumni by any means possible. Ma’am spoke about how physiotherapy has evolved in recent few years and what to expect in life once you enter this field. Ma’am spoke about different specializations one can pursue after BPT. Students also participated with much fervor and enthusiasm.

The seminar was a huge success. Dr. Nidhi Kalra, Officiating In-charge felicitated Dr. Shreshtha with a planter and a gift as vote of Thanks.
